

The background of the entire cover is a vibrant orange. It is densely decorated with various black line drawings of botanical elements. These include a wide variety of leaves (some simple, some with veins, some fern-like), flowers (daisies, tulips, roses, etc.), cacti (columnar, barrel, and potted), succulents, and other plants like aloe vera and herbs. Some plants are shown in pots. The central text is contained within a large, light-colored oval.

Welcome to Botanical Line Drawing!

This is such a playful, sometimes delicate, and easier-than-you-probably-expect art form that doesn't require many materials, but does allow you to branch out and create something gorgeous by applying other types of art to your illustration. Line drawing looks lovely as a standalone piece, but also works well when incorporating watercolor, hand lettering, etc. Adding line drawings can really bring a piece to life.

This step-by-step book guides you through pages and pages of simple illustrated instruction, introducing 5 steps per illustration. You will see that each step adds onto the shape or detail, and in no time, you'll have produced your very own coveted line drawing!

I encourage you to pull out a sketchbook and practice these flowers separately, then bring them together to showcase blending them together for a lovely floral wreath, bouquet, wildflower field, succulent garden, etc. Options are limitless within this art form!
